

Value equal to index value

找到数组中元素值与下标相等的项，并输出

```
#include<iostream>

using namespace std;

int main() {
    int t;
    cin >> t;
    while (t--) {
        int n;
        cin >> n;
        int i, a[n];
        for (i = 1; i <= n; i++)
            cin >> a[i];
        int flag = 0;
        for (i = 1; i <= n; i++) {
            if (i == a[i]) {
                cout << i << " ";
                flag = 1;
            }
        }

        if (flag == 0)
            cout << "Not Found";
        cout << endl;
    }
    return 0;
}
```
